

Crack this code*!

(*if you can)

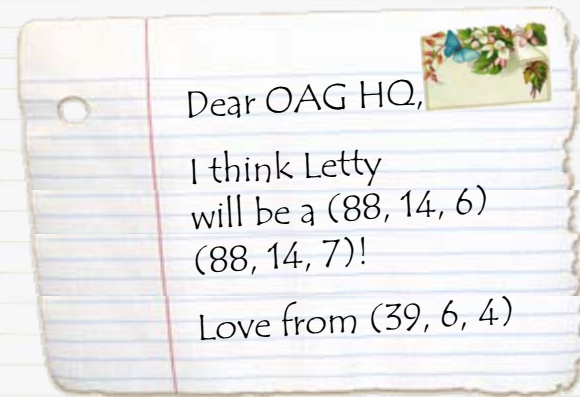

Grab your copy of *Letty on the Land* and you can crack this **tricky code**!

Some words have been replaced by a secret number combination, which shows you where to look in the book to find what you need. For example, (25, 3, 7) is where you will find the word 'her'. (See the tiny writing on the next page if you need an extra hint!)

At the (1, 9, 6) Letty's story is (87, 6, 1),
Grace would (5, 7, 3) forty-four (34, 4, 5) old.
That means she would be (46, 15, 3)
(32, 10, 3) to be (23, 1, 7) (50, 16, 1)!

What do you (43, 4, 6) that each of the OAGs
will (85, 18, 4) when they (10, 11, 3) (69, 14, 8)?

Will Grace be a (89, 11, 2)?
Will Letty be a (11, 20, 4)?
Will Poppy (52, 5, 7) (95, 1, 3) (75, 10, 3)?
Will Rose (64, 6, 4) lots of (75, 1, 4)?
Or are these all (29, 17, 2) ideas?!

And if you write and tell us what *you* think the OAGs will do, we'll put your ideas on our website!

(Even better, why not try writing to us in code?)

Hint: Think about pages, lines and words...
